Donned in 30 seconds
without touching the outside

 **Total safety**

Remove any risk of
contamination during
the gowning procedure

 **Economical**

Reduce your costs
whilst increasing your
productivity and quality

BeMicron[®] Health-Care

Gown enabling pharmacists, technicians and surgeons to dress independently

 30 sec

PIC/S

The BeMicron Health-Care gown enables sterile gowning without the help of a nurse, while avoiding any risk of contamination

Made from a fabric carefully selected for its quality, performance and lasting reliability, it offers excellent mechanical strength and protects the operator against the various risks arising from their work. It has a perfectly-smooth technical filtering wall, both front and back, and constitutes a veritable barrier against human contamination.

Thanks to the folding system and donning procedure, the operator's movements follow each other automatically without need to touch the outside of the coverall and without errors in procedure.

The doning procedure

1

Out of the bag

2

White = left
Red = right

3

Easy gowning
system

4

Easely
adjustable

5

Zipper quickly
closed

30 sec

BeMicron[®]

Reinvents the cleanroom
coverall and laundry

BeMicron® Health-Care

A hood which adjusts perfectly. Opening from back, up to top of hood

The coverall can be perfectly adjusted horizontally with studs. The gown is provided with the back opening completely sealed, from the base of the back to the top of the hood.

The jacket can be used with or without hood

Without hood in the classic version and with cowl to offer protection reinforced by the independent aseptic gowning system concept

The jacket can be used with or without hood

Without hood in the classic version and with cowl to offer protection reinforced by the independent aseptic gowning system concept

Closure by snap fasteners in the back, easy garment removal without risk of operator contamination

Easy undressing thanks to unconnected back opening, simply separate the studs and remove the clothing.

The garment can be completed by BeMicron Cyto boots

For increased protection, the gown can be worn with a pair of boots. This system is an original substitute complementing conventional 'coverall' clean room attire. This clothing system with a gown is thus perfectly suited to the practices of a hospital environment.
